

Tired of your waterfront property looking like this?

Zebra mussels and other environmental factors are clearing the water, allowing the sun access to the bottom, promoting aggressive aquatic weed growth. This proven, patented, cleanable, geo-textile **NOWEEDMAT™** prevents the sun from reaching the lake bottom, killing existing weeds and preventing further growth. Normally, after 4 - 5 weeks, you can move the **NOWEEDMAT™** to another location and double your weed free area for the season.

Easy Installation

Annual installation is easy. After spawning season, the NOWEEDMAT™ is simply unrolled, floated into the desired location and allowed to slowly sink into place. Once down, place available shoe size rocks, sandbags or other natural (smooth) objects to hold the edges and corners secure as needed. Sand filled PVC or rebar recommended in areas with strong currents.

Single 9ft x 30ft section shown above.

The NOWEEDMAT™ is 18ft x 30ft, provided in TWO, easy to install, 9ft x 30ft sections, each weighing only 12 - 15lbs, allowing for highly versatile installations, with a total coverage area of 540 Sq feet. It can also be cut to fit!

Easy Removal and Cleanup

At the end of season, simply remove the NOWEEDMAT™ from the water; lay it on rocks, beach or driveway, (*never on lawn or vegetation*), remove any large debris, hose it clean, soak thoroughly with a diluted solution of water and NOWEEDMAT™ Cleaner ¹ and allow to sun dry. Use the recommended (biodegradable) NOWEEDMAT™ Cleaner ¹ which helps deodorize, prevent mildew stains and extends the life of your NOWEEDMAT™. Some sand and particles will always remain in the fabric but will not affect performance. Finally, roll up the NOWEEDMAT™ and store it in a dry location protected against rodents and other nesting creatures.

¹ Do Not apply NOWEEDMAT™ Cleaner over grass or other vegetation.

GREAT Results!!!

Annually maintained with NOWEEDMAT™ Cleaner ¹ and stored as recommended, the NOWEEDMAT™ can give you up to 10 years of “soft on the feet”, weed free swimming and boating pleasure.
